SUPPORT

FreedomFast, compact support for led wall!

FreedomFast is compact support for led wall traveling in flight case!

FreedomFast is the self-supporting positioning system, quick connect, made of aluminum, ideal for diversified led systems.

Fast, versatile, compact, modular: Freedom Fast is the freedom to be fast in every single installation! The led wall support compact version black finished, is from plain and simple design, it is the fastest solution and the immediate response to the unconditional need led wall / protagonist of the event / show.

The features of **FreedomFast** are :

- **Compact and Lightweight:** individual components (front and back feet, the stabilizers, the positioning guide and central fixing) dismembered enter into a flight case. The modularity, ensuring the functionality of the LED wall support

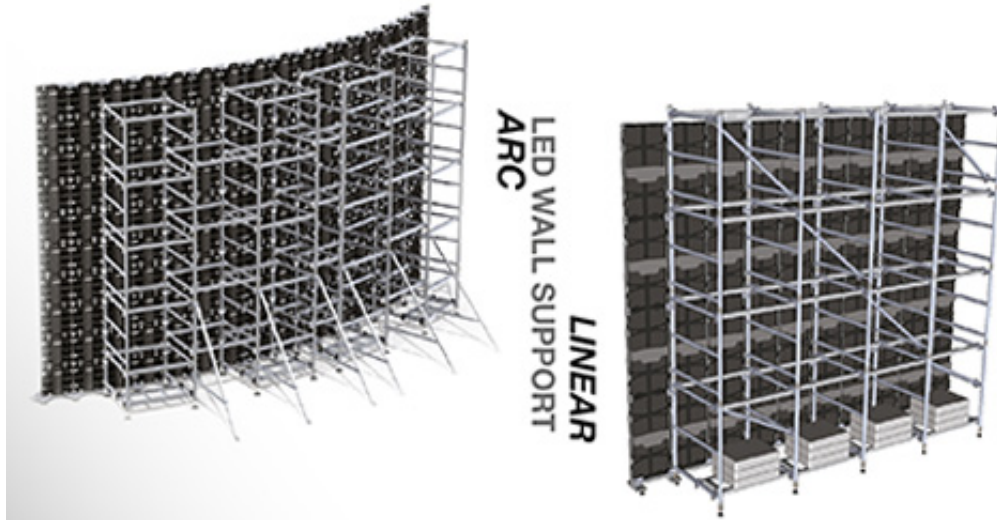

system, simplifies handling and storage.

- **Modularity:** the modular base with adjustable feet is adaptable to different dimensional types of LED modules.
- **Versatility:** the modular base with adjustable feet is adaptable to different dimensional types of LED modules

The ledwall support system must be duly ballasted (*you can request a back ballasted compatible device*)

For more information [Click here](#) or [Contact us](#) »

The creation of ledwall walls of more ambitious dimensions and scenically greater impact requires type configurations **Linear led wall Support** or **Arc led wall Support**.
