CROWD BARRIERS with **Fingers Save** system Gate access module

Crowd barriers designed by **Efesto** with exclusive **Fingers Save** system are available also with gate access.

The crowd barrier with gate access module meets the need to have a quick and easy opening in the barrier to allow greater access to authorized personnel always guaranteeing the robustness of the barrier.

Crowd barriers with gate access combines fast with the standard modules or adjustable corners modules.

Always attentive to the safety of operators, **Efesto** has designed a crowd barriers structured with design **Fingers Save** system. **Fingers Save** system is the combination of the rounded corners and the special self-centering connector system that is attached.

Set up and assembly are fast and easy thanks **connection kit: only two bolts**. Flat folding design they can be stacked on dollies for easy transport and storage.
