Department revisions chain hoists in Efesto!

EFESTO officially announces the birth of the new internal **department revisions and maintenance** of electric hoists.

The department, managed by authorized staff, guarantees a qualified service and maintenance of electric hoists. Tasks carried out by the new department have checks and periodic maintenance by law, repairs with original spare parts of **different brands engines**.

The general review imposed by current regulations (*Legislative Decree 81/2008 - Art. 71 - Paragraphs 4 and 8*) is a preventive measure to preserve the maximum functionality of hoists.

The lack of maintenance or inspection can cause the reduction of functionality and / or damaging of the hoist in time.

The **verification of the motor** has the aim of identify possible constructive elements and / or particular defective or about to be; the replacement of the same is aimed to restore the state of safe operation of the hoist.
