ChainRunner, aluminium device for safe cables

Cables protected and in safe position!

ChainRunner is a valid solution for the management of safety cables. In fact, ChainRunner is designed, for the entertainment industry, to provide operators with a safe solution in cable management.

ChainRunner is aluminium device and applied to the hoist chain protects the power cables, control, audio connected to truss applications on the move.

Advantages

- **Safe:** with an adequate number of ChainRunner on the chain all cables, connected to the moving trusses, are in a safe position. ChainRunner is manufactured according to **ISO 9001-2001** and is **CE**.
- **Versatile:** the Chain Runner range adapts to STAGEMAKER's hoists but also to most of hoists on the market. ChainRunner is compatible with **chain up to 8 mm diameter**.
- **Practical:** the application of ChainRunner takes place without the need to remove the chain or the hoist hook and does not require the use of additional tools.

ChainRunner is light, practical and low maintenance: the ideal and economical solution for cable management!
