LOADING RAMP

LOADING WITHOUT *EFFORT!*

Loading ramps produced by **Efesto** are suitable for everyone's needs and work in combination preferentially drive business and in every situation where there is an obstacle to overcome with steps.

Entirely realized in aluminum with **anti skip surface** with the edge of **the lateral protection flaps** and the furniture in the upper and lower part to avoid the creation of steps with the load floor.

Efesto offers two variants of ramps: version - **one element** and the version **two or more elements**. Version two or more is the right solution to any need for space optimization.

Efesto ramps can handle *light loads* up to **400 kg**. The width and the length of the ramp determined by the height of the van reference makes each ramp a customized solution for the user.

The **Efesto ramps** are lightweight solutions and resistant designed and designed to different uses and destinations: these are a valuable ally in all the operations of movement of goods, animals and / or people.
