EFESTO at Prolight+sound ... News preview!

On the international stage of the Prolight + Sound, EFESTO announces a preview of the presence of one of the most significant members (the medium version) of Speedyside family.

The components of Speedyside family is a ideal solution for easy and fast sidewalls configuration of scaffolding or roof systems.

The components Speedyside family stand out for different heights, modularity (length 200, 300 or 400 cm) and performances; these have a built upper rail profile ideal for a easy scroll the pvc sheets or different cover system (for example scrim or advertising posters).

Installation is fast, sure and clean because the components are fixed to scaffolding or roof systems by joints suitable.

Covering the wall sides, Speedyside family secures the structures from wind , rain and any other environmental factor: of course can make protected backstage areas.

Depending on the type of roof, sidewalls have to be removed above certain wind speeds.

Speedy medium

Joints

Other protagonists of our stand will be:

- SpideRoof: roof-easily adaptable to most types of structure thanks to exclusive excursion adjustable side
- Speedy BETA stage & Speedy GAMMA stage: stage boards of new generation with Fastlock, coupling system and positioning frame built for a solution from the stage light and quick assembly

In the days of the event will be presented the catalog EFESTO2015 with many new features, possible solutions and modular configurations.
