

## Fork ends trusses: less flexing more security - News Efesto

### [Fork ends trusses: less flexing more security](#)

#### Trusses Efesto

Efesto completes its trusses series presenting the Superior High Load line with the particular **fork connection system**. Heavy load trusses, ideal for important spans configuration, are completed with fork ends that represent a further details regarding the **structures security**. In fact thanks to particular joints "male-female" extremely easy and quick to assemble, are reduced to minimum the trusses flexion due to developable flow. Detail more important in terms of safety and performance is represented by the **Security System** with increased connection that presents **two incorporated elastic pins** that guarantee more stability and unique performance.
