Towers Efesto

Tower Lift is the easy professional support for truss, audio-light system, usable to manage great and little events. **New generation towerlifts** improved for technical measures and increased functionality, are available to 4 and 5 elements with different height and capacity. Designed in elementary way, Lifting System family's members make less hard the lifting work and the support:

- **The bearings-winch system** favors a **wire steel rope easy scroll** that with **6 wire and metallic core** presents a reduced rotation and high-reistanceto breakage and effort.
- The fixed feet wide aperture terminals and stabilizers adjustable in height make the telescopic pole safe during the work phases.
- The base, with increased wheels **compared to common lifting system**, is easily movable by a reduced developed in the resting phase (closed).
